

innate immune system of pdf

The innate immune system is one of the two main immunity strategies found in vertebrates (the other being the adaptive immune system). The innate immune system is an older evolutionary defense strategy, relatively speaking, and it is the dominant immune system response found in plants, fungi, insects, and primitive multicellular organisms.. The major functions of the vertebrate innate immune ...

Innate immune system - Wikipedia

Both innate and adaptive immunity depend on the ability of the immune system to distinguish between self and non-self molecules. In immunology, self molecules are those components of an organism's body that can be distinguished from foreign substances by the immune system. Conversely, non-self molecules are those recognized as foreign molecules. One class of non-self molecules are called ...

Metabolism meets immunity: The role of free fatty acid

Thus, this genetic "accident" in a Silurian fish enabled the random generator of the adaptive immune system to develop. This "invention" conferred a tremendous selective advantage in fighting off infective threats, so that the offspring of this fish pushed all other then-existing vertebrates into extinction, with exception of some lamprey and hagfish.
