Piaget's (1936) theory of cognitive development explains how a child constructs a mental model of the world. He disagreed with the idea that intelligence was a fixed trait, and regarded cognitive development as a process which occurs due to biological maturation and interaction with the environment.

The use of entheogens such as ayahuasca is exemplary of the long and ongoing tradition in many cultures to employ psychoactives as tools that stimulate foundational types of understanding. That such substances are capable of stimulating profoundly transcendent experiences is evident from both the academic literature and anecdotal reports. This article attempts to present these concepts in such ...
